Now in Three Part Harmony

TenCORE®

Authoring Products

Solo or in concert, TenCORE's® trio of authoring products are the right instruments for developing your CBT classics. Together they meet the diverse needs of first time authors, instructors, and advanced CBT developers. Stand-alone or networked, TenCORE authoring tools perform on the IBM family of PCs along with the leading interactive video systems.

TenCORE Producer

Compose quickly with this easily mastered authoring system. Pull down menus and icons let you visually lay out displays, combine them with questions or menus, and immediately have a working lesson. A noteworthy and upward compatible addition to the TenCORE family of authoring tools.

TenCORE Computer Managed Instruction

Concentrate on conducting the show and spend less time scoring with the TenCORE CMI mastery-based testing and record keeping system. It offers fully prompted question editing and administrative options. Student records can be transferred to standard database packages.

TenCORE Language Authoring System

Even the most discriminating authors rave about its power and flexibility. Prompted display editors combine with a powerful command structure giving you maximum control to confidently implement any instructional design. The choice of professional CBT developers around the world.

TenCORE—Great performances for the CBT maestro.

The TenCORE® family of fine authoring products

The right tools for the job . . .

Whether you're a first time author, an instructor, or an experienced courseware developer, there's a TenCORE system just for you. The TenCORE family now includes three complementary authoring products designed to satisfy your organization's entire computer-based training and interactive video needs.

Tailored to your level of expertise

The **TenCORE Producer** is a complete authoring system for developers who want the power of a professional tool in an easy to learn and use package. The visually oriented editing system utilizes pull down menus and icons to create a friendly and productive authoring environment. Ideal for quickly creating attractive lessons, the Producer combines high quality computer graphics, interactive video, flexible branching, and structured answer judging capabilities. Instructor options are also included for monitoring student performance and lesson completion.

The **TenCORE Computer Managed Instruction System,** a mastery-based testing and record keeping system, provides organizational and administrative support for your individualized training. The system features menu-driven test editors, comprehensive score keeping, and the ability to transfer student records to standard database packages. With TenCORE CMI you can quickly achieve the benefits of computer-based learning with your existing instructional materials.

The **TenCORE Language Authoring System** offers the ultimate flexibility in producing interactive courseware. Designed to meet the needs of the most demanding author, it combines the powerful TenCORE command structure with prompted display editors. This gives you the advantages of the world's most widely used authoring language and a highly productive editing environment. Perfect for creating sophisticated lessons and real-time simulations which include animated graphic and video displays, flexible lesson structure, and realistic response analysis.

Open-ended

The TenCORE family of authoring tools has been specifically designed to adapt to your growing needs. Courseware created with the TenCORE Producer may be edited and enhanced with the TenCORE Language Authoring System. Lessons created with either authoring system may be used as learning modules in the TenCORE CMI system. In addition, the ability of TenCORE products to access external applications makes it possible for you to extend their flexibility to meet your unique, individual needs.

Used by CBT professionals around the world

Leading universities, corporations, government agencies, and custom developers have consistently selected TenCORE authoring tools for their powerful ability to create the highest quality courseware for today's training needs.

Dedicated to your success

TenCORE products are the result of 25 years of pioneering experience in developing computer-based authoring software. They reflect our commitment to keep pace with changes in training technology. TenCORE systems run stand-alone or on local area networks. Each includes an unlimited run-time license for delivering courseware anywhere within your organization.

TenCORE systems, user training, and quality customer service are available in over 20 countries via our worldwide network of experienced dealers.
